

ACCENTURE SECURITY

OUT-INNOVATE CYBER ATTACKERS VIDEO TRANSCRIPT

Narrator: Organizations that yesterday were assumed unassailable, are today's go-to cookie jars. Cyber attacks. It can happen anywhere. They can happen everywhere, even in your own backyard. Security breaches are more creative, more powerful, and more innovative than ever, like invading hordes in a digital Trojan horse.

Newscaster: Credit card numbers and security codes for more than 2 million shoppers have appeared on the black market.

Newscaster: Investigators have traced the origin to an online shopping site because executives were unaware of the intrusion.

Narrator: No target is too big or too small or too well defended. It's not enough to outmaneuver cyber attackers. You have to out innovate them by simulating real world cyber crime. Launching, replicating and going well beyond zero-day threats with red teaming that uses the same threat centric tactics, techniques and procedures that their attackers use or will use.

Actors: If you're going to be the heavyweight champ, get yourself a real sparring partner.

Narrator: Exploiting the weaknesses that put your company at risk.

Narrator: That's why Accenture, your partner in the board room also protects your back room, basement, war room and security operations center. Constantly preparing, protecting, responding and defending. All in the name of business resilience. Welcome to Accenture Security. Where together we red team the toughest cyber challenges out there. Not just information security engineers, but innovators who have the creativity, ingenuity, and technical depth to actually replicate the sophisticated attacks that adversaries wage everyday.

Narrator: Accenture Security. Building business resilience from the inside out...so you can Grow with Confidence.
